Irving and Shaw Speak Here Friday

Strathmore is to be favored on Friday evening of this week by addresses from Mr. Wm. Irving, Federal Member for East Calgary, and J. T. Shaw, Federal Member for Bow Valley.

The meeting will take place in the Memorial Hall, and every voter should be present to get a first hand insight into the work of each of our parliament, and the prospects for the future. The meeting is under the auspices of Strathmore U. F. A., but everyone is welcome.

IRRICANA NEWS

This (Wednesday) evening at 8 p.m. Mr. Irving and Mr. J. T. Shaw, M. L. A. for Golden constituency, will speak at Cheadle, the meeting being held at 8 p.m. in the Ladies' Hall. Regardless of their political opinions, every voter should endeavor to attend one or other of these meetings, for they show evidence on the part of the elected representatives to meet the electors and explain the present political situation to them.

NIGHTINGALE NOTES

The irrigated crops around here are looking fine, any person who does not believe in irrigation should take a look at the crop of Kimmitt River, and then they will change their minds. They have the best crops in the district and great credit is due the boys as they are always glad to give pointers to anyone on irrigation.

Mr. Batten just recently took drive east about 150 miles and reports crops are good in this district compared to some.

The big rain early Saturday morning will do wonders to help out late oats and feed but is one month to late for some crops on dry land.

Don't you notice the Calgary papers every time we get a few spots in the rain they say general rain, one million dollars in the pockets of the farmer.

Quite a lot of people took in the Chautauque and reported a good time. The little Frederick girls are staying with their grandparents, Mr. and Mrs. McLean.

Lord Clark shot and killed a coyote in his yard one morning this week as it was after his pocket.

The new station (Dunshalt) 1 mile east of Nightingale, is going ahead. A big bunch of teams and men are working there and getting in a big grade to make a loading platform and a new station. Several elevator companies have applied for space. There is also some talk of the C. N. R. making a Y and using this place for a terminal.

The house Dunshalt was sent in by Mr. McLean, the old time resident for 22 years. Mrs. McLean was born in Dunshalt, Scotland.

Lightning Starts Fire

In the severe electrical storm of Saturday morning, lightning struck a telephone pole close to the residence of Mr. Tom Barry, six miles north of Strathmore. The pole was split in two, and the lightning travelled along the wires and set fire to the telephone instrument in the house. Mr. and Mrs. Barry were awakened by the loud crash and managed to put the fire out.

The intensity of the lightning was such that four windows were broken by the concussion.

IRRICANA NEWS

Owing to the severe hot sun of the farmers gave up work in the middle of the day, the best being in the house for the sun as well as the horses, but frequent showers since have cooled the air which is very much appreciated.

Mr. Arthur Gregory who met with a severe accident a couple of weeks ago is able to be about on crutches and is as well as can be expected.

Mr. E. Harding and his sister, Mrs. Grace and Mr. Harding moved to Strathmore this week accompanied by Mr. and Mrs. Bruce Hay, they expect to be here a week.

Messrs. H. Ray, Long, and Mrs. McCune with their families, motored to Strathmore where they spent a couple of days picnic.

Miss Elsie, Alberta, and Carmen Scratch were also picnicking at Strathmore this week.

Mr. Niece of Chulivick, B. C., has returned to Irricana, his wife and daughter are expected in the near future.

The game of basketball between Irricana and Yanley Valley was a tie score being 7-7.

Farmers are buying in this community.

What has ripened very fast in the last few days and some fields are already being harvested.

The Misses Gibbons have been engaged to teach in Irricana next term.

Of the three girls who tried their Matrimonial exams, not one was successful. We are now anxious to know what the loser girls have done.

Miss Margaret Ramsey returned to Calgary after spending a couple of weeks at Clover Pale Farm, she was accompanied home by Miss Velma Scratch who will spend a week in the city this week.

We regret to report that Mrs. Colclough, who has been suffering for some time with an abscess in her face is not much improved.

Mr. Spitzmuller, wife and family accompanied by Mr. Spitzmuller's sister, husband and children, spent Friday with Mr. and Mrs. G. Long.

The bride opposite Mr. Colclough on the main road to Drumheller is being repaired by Messrs. Scratch and Colclough.

Mr. Kenneth Dwin chair of the Sun Day School visited this week.

Miss Stella Ewing has returned home after spending a few days with her friend, Miss Hilma Wilson.

Councilor Dwin chair of the Sun Day School after which a short run was given by Mr. McLean.

Bob Salmon, one of Strathmore's best business men, and who was for a time in partnership with Jack Dunlop in the store now occupied by Mr. M. B. Garrett, was in town for a couple of days this week. He has been farming in England since 1915.

Langdon Fair on Friday

Langdon and Bow River Annual Exhibition is being held on Friday of this week. Along with the agricultural entries there will be a day's sports, including horse and foot races, basketball, baseball game, etc., etc. Strathmore baseball team will provide the opposition against Langdon.

A dance will be held in the evening, music being supplied by Hirtle's Orchestra.

There has been a very good supply of entries already in the various classes at the fair. \$2500 is being offered in prize money. The classes include horses, cattle, swine, sheep, poultry, sheep and grasses, roots and vegetables, fancy work, dairy produce, school work, etc.

We hope to see a large attendance at Langdon Fair. Some fairs are being cut out altogether on account of reduced government grants but Langdon is carrying on merrily on.

The annual meeting of the Langdon and Bow River Agricultural Society will be held at the L. O. O. F. Hall, Langdon, at 8 p.m. on Saturday, August 19. All members and every one interested please attend.

NAMAKA NEWS

The road between here and Strathmore got quite a little use during the past week. It is a great pity that the road for five miles south of Strathmore was not in better condition. Several of the people in this district took in the Chautauque and all seem of the same opinion, that it is one of the most pleasant diversions that take place during the whole year.

We fail to find even one that was not more than satisfied with the splendid entertainment put on, and take this opportunity to congratulate Strathmore in being able to have the Chautauque run in 1922.

Mr. Harold Wooster and family are spending a vacation in this district and are being entertained by several of their old acquaintances.

Mrs. W. J. McIntosh, Mrs. A. Morgan, Mr. W. H. Baker and son Harry are spending a vacation at Strathmore.

An ice cream social under the auspices of the church will be held in the L. O. O. F. hall on Wednesday the 9th. We trust all who are able will be present and make the acquaintance of the new minister.

NOTICE

The Grasshopper Poison Mixing Station at Ardenode is now closed. Poison can be obtained by giving one day's notice to Ardenode Station. F. W. EWING.

Wheat Harvest to Start This Week

Good Rains During Weekend

Hot dry weather in the first part of last week has matured the crop rapidly, rather too rapidly in fact, and there is no doubt that the dry weather has somewhat reduced the crop yield, especially in those parts of the district where previous moisture had been deficient.

However, heavy rain fell from about 1 a.m. on Saturday and lasted till the middle of the day, and on Sunday evening an other heavy rain fell, preventing any further drying of the crops.

So far this season there has been no less from 10 to 15 inches of rain. The crop situation though on crops which are nearly matured it will not have any effect. It will be very beneficial for oats and feed, and will assist in siling the heads of the other crops.

Re-cutting has been in full swing for the last ten days. Cutting of the wheat will start this week, with favorable weather, and farmers are now being set into shape for the big event of the year.

Taking the district as a whole, the dry land wheat yields will vary from ten to twenty-five bushels, while irrigated will run from thirty to fifty. However it is impossible to determine the yields precisely until threshing, as they vary so much according to locality.

So far this season there has been no less from 10 to 15 inches of rain. The crop situation though on crops which are nearly matured it will not have any effect. It will be very beneficial for oats and feed, and will assist in siling the heads of the other crops.

Tennis Notes

Last Wednesday the Rockford tennis club had Strathmore a return visit, when a series of games were played off on the local courts.

The visitors arrived somewhat late and were not at full strength however some first class games resulted and the Strathmore club proved the winners.

This Wednesday the local club ran to Rockford and are hoping to be able to take a representative team with them, this is the last game away from home this season.

Following are the various results of Wednesday's games:

Strathmore—H. Vicars and C. S. Lait 2, W. P. Rawlings and A. R. Bower 2, P. R. Baines and Dr. Givins 0, Miss A. James and Miss A. Bolen 2, Mrs. Williams and Mrs. Springthorpe 2, Mrs. Givins and H. Vicars 2.

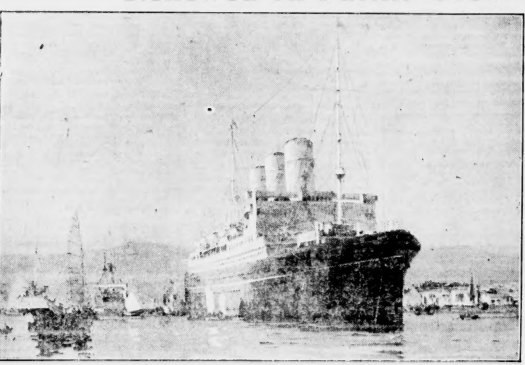

Rockford—Mr. Dawson and Mr. Samson 0, Mr. Hinesworth and Mr. Budd 1, Mr. Miller and Mr. Scott 2, Mrs. Hinesworth and Miss Griffith 0, Miss A. James and Miss A. Bolen 2, Mrs. Williams and Mrs. Springthorpe 2, Mrs. Givins and H. Vicars 2.

ment road gang started work on the south road this week. Let's hope we get a thorough job this time.

South Road Is Being Repaired

The representations made to the Provincial Government by Mr. D. H. Valley and the town of Strathmore have at last borne fruit, and a Government road gang started work on the south road this week. Let's hope we get a thorough job this time.

Battle for Marine Supremacy Renewed on Pacific Ocean

The "Empress of Canada," the new C.P.R. liner which opens a new era of development in Canada's trans-Pacific Trade.

THE arrival at Vancouver of the "Empress of Canada," the new C.P.R. liner which opens a new era of development in Canada's trans-Pacific Trade, has renewed the battle for marine supremacy on the Pacific, and there we may expect an area of breathless competition. British navigators, and British traders led the way there, and it was the Empire to remain in the lead. The Dominion of Australia, New Zealand and Canada must also vie for the mastery of the Pacific, and the immensity of the possibilities. As an evidence that Canada is ready to meet all centers in Canada's trans-Pacific trade was outlined recently the Canadian Pacific sends to the North Pacific one of the finest products of the shipyards of the Empire. It is our hope and our expectation that she and her sister ship will be deemed worthy of the flag which they fly, and that during their lives they will contribute greatly to the upbuilding and advancement of Canada's Pacific trade.

The "Empress of Canada" is 21,577 tons gross register, 627 ft. long, 32 ft. 6 in. beam, with a cruiser stern, three funnels, and two masts, and is the second largest vessel in the world to pass through the Strait of Juan de Fuca.

Canada's ship accommodation for the Pacific is second to none. The "Empress of Canada" has 120 staterooms, and 240 third class passengers, and special, carefully equipped quarters for 925 sailors, while her full crew comple-

COMING EVENTS

Children appear at Mrs. J. French's home on Thursday, August 17, 5:30 to 7:30. Danier Ladies Guild. Tickets 50c. Dinner afterwards, weather permitting. 1829

BIG SPECTACLE

Coming to the Memorial Hall, Wednesday, August 16th, the wonderful production "The Black." Half the world has read the book. The whole world will see the picture. Playing now at Grand Theatre, Calgary, Royal Prices.

The Women's Institute meets at Mrs. C. C. Sorenson on August 16th. Beautifying the home grounds will be the subject discussed.

RICH IN VITAMINES

MAKE PERFECT BREAD

WORLD HAPPENINGS BRIEFLY TOLD

The Rumanian Government has made what a temporary monopoly. Sid Mohamed Naezar, the Bey of the regency of Tunis, Africa, died at the age of 67 years.

The Washington Treaties, ratified at the pact signed at the Washington armament conference, passed the committee of the House of Commons.

A manifesto appealing the British Government of violating its pledges to the Arabs has been issued by the delegation in London.

Former Empress Zita of Austria, who is being temporarily sheltered in Spain, is said to be endeavoring to obtain a home in Bavaria provided she can obtain the consent of the allies.

Shell fire from a fort controlled by Chen Chiang Ming, the United China leader, destroyed the mainline base of Sun Yat Sen, the deposed president of the Canton Government.

Arrested on a charge of manufacturing bombs, Vladimir Castro, mayor of Leningrad, blew up the court-house, killing all the occupants, says a dispatch to Central News.

The treaty between Japan and China, negotiated at the Washington conference, providing for the return of Shantung to China, has been signed with the League of Nations.

The London Evening News says: "Arrangements for repayment of the British war debts to the United States in a lump sum in the near future are in an advanced stage."

Twenty blind men employed in the Pennsylvania Association for the Blind at Wilkes-Barre subscribed to a strike order because their foreman, also blind, had been displaced by a man with eyesight.

Royalty Discouraging Snobbery

Encouraging Good Feeling Between Boys of Different Social Status

The Duke of York, second son of the King, in replying this year to the experiment he made last year for what has been called the "discouragement of snobbery," so through an understanding was then established between boys from Westminster School and boys from a Welsh school, following a football match, that a summer camp was to be held by the Duke to encourage good feeling between boys of different social status. Two hundred public school boys with an equal number from congested and industrial areas were invited to share the camp.

DEEP HOLLOW COUGHS ARE MIGHTY DANGEROUS

That snafe cough is everywhere you go, deep and hollow, why—because consumptive. First it was a cold, next came Catarrh, finally deep seated cough, the trouble was there. Never needed a cold, not even a little one. Next tried with your throat or Catarrh. Got out your "Catarrh zone inhaler," breathe deeply into your lungs, the healing sound, the vapor of Catarrhzone. Let Catarrhzone clear the nostrils. You'll wonder at the change when you use this healing remedy. It really stops it for bronchitis, colds, bronchial irritation and Catarrh trouble. Sold everywhere. Two suitable treatments \$1.00, small size 50c.

Banner of Postage Stamps

150 Attached to Letter Mailed in Soviet Russia

With a "banner" of postage stamps 3 feet long and 7 inches wide attached, a letter has just been delivered from Soviet Russia to Ben Tivie at Wandsworth. The letter was posted in a suburb of Kieff.

The stamps are 120 in number—5 are 200-ruble stamps and 109 are 5,000-ruble—of the total value of over \$25,000. As before the war, and the Russian revolution the ruble was worth round about 50 cents, the present face value of these stamps would \$25,000. Now the total actual value is trifling.

No man or woman should loathe a certain relief at his hand as Mr. Poy's Corn Remover.

The cost of a doctor's dose runs in a German university is now 600 marks, about 16 at the present rate of exchange.

As an experiment at the University of Wisconsin, cows are being fed alfalfa treated with water.

Quite Chic!

With her blue bird hat of millan and taffeta, she wears gauntlet gloves of heavy silk, with wrist straps, held in place by a buckle.

MANY CHILDREN SICK, HOW TO TREAT THEM

The kiddies will get their feet wet, catch cold, get cramp and give their mothers lots of trouble. With the first cough or sneeze, rub the little nose's chest with Nerville. Rub it plentifully. It can't harm. Then make a gargle with Nerville and water, and have the child gargle for five minutes. Just at bed time, give the child ten drops of Nerville in his sweetened water. The result is fine, and next morning child is better. Nerville is a great protection in the home. Large 50c bottles at all druggists.

Barnes committed his poems to memory as he composed them, and when he sat down to write he had before him no labor of composition, but only the task of writing down what he had already finished.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugstore.

Chinese Girl Wins Prizes

Twelve-Year-Old Student Excels As Cook and Essayist

—One of the happiest of the 170 children who were graduated from Public School No. 22, Bayard and Mulberry streets, New York, was Miss Fienwei Low, twelve-year-old Chinese, living at 21 Mott Street.

Besides winning the Morgan award of \$25 for being the best cook in District L, she won the second prize of \$15 in the Evening Post composition contest with her essay on American history. The contest was open to all school children of New York under sixteen years of age.

About 100 essays were submitted. Miss Low was one of the fourteen honor pupils who occupied seats on the platform with the school principal, Joseph D. Reardon, and the teachers. Her teacher is Miss Ethel C. Baglin. Fellow-graduates and schoolmates applauded enthusiastically when Florence stepped forward to receive her prizes.

"The Chinese make ideal pupils," Mr. Reardon told a reporter. "In the twenty years of my teaching career I have never encountered a Chinese child who did not have an excellent school record."

Of the 170 graduates ten were Chinese boys and girls.

Recovering Fuel

A new process is now in use for recovering fuel from tinders. A hundred tons of coal used in a furnace leave about twenty tons of cinders, from which five tons of good coal fuel can be recovered by means of a magnet. The fuel contains sufficient iron to make it possible to extract it from the non-magnetic ash, and it is believed that millions of tons of fuel can be saved in this way.

Siberian Rivers Have Ice Beds

Rivers in Siberia are different from rivers in other parts of the world in one feature, many of them running over beds of ice. One of the tributaries of the Lena River has a bed of ice from nine to twenty feet in thickness, over which the water has been flowing probably for hundreds of years.

Mintz's Liniment for Burns, etc.

Keep Money in Family

William Rockefeller Did Not Leave Anything to Charity

William Rockefeller's will, which has just been made public, leaves an estate of \$15,000,000, not one dollar of which goes to any charity, philanthropy or public service. The whole vast estate is left to the members of his family. Even an old retailer who had shined Rockefeller's shoes for forty years, and was specially invited to the funeral, being overlooked. Rockefeller's money was his to dispose of as he saw fit, but the manner in which he has passed it on to his descendants will tend to promote legislation that will make it impossible for vast estates to pass intact to future generations. Successful state laws are by year taking a larger toll of inherited wealth, and such striking examples of selfishness as William Rockefeller has given will be a powerful argument in the hands of those who see a grave and growing menace in the concentration of wealth in the hands of a comparatively small section of the population.—Farmer-Sun.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles, to cite a few, are the common ailments of this time and often a precious little life is lost after only a few days' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Circus Tours Through the Canadian Pacific Rockies

Delightful Trip Afforded for Tourists Over C.P.R.

By the most magnificent mountain and inland water trip in the world, passing through beautiful Banff, lovely Lake Louise, Field and Glacier House, to Arrowhead, a steam train through the Arrow and Kootenay Lakes, winding in and out past majestic mountain peaks—touching at West Rohn and Nelson enroute.

This delightful trip can be made in the opposite direction if desired and at remarkably low cost.

Any Canadian Pacific ticket agent will gladly give full information and arrange details.

World's First Broadcasting Auto

The first radio broadcasting automobile in the world was operated on the streets of Winnipeg in a test trip which proved an unqualified success. The remarkable feat of broadcasting the human voice through the air from a rapidly moving car using a specially designed transmitter was accomplished after exhaustive experiments by L. V. Ballou, radio engineer.

Profounders Are Fallible

"But I do myself by the aid of medical books."

"Yes and some day you'll die of a misprint!"—Boston Transcript.

The Exodus from Canada

Greater Proportional Increase in Population in Canada than in the States

There has been a great deal of unnecessary discussion and regret over the supposed loss of some two millions of our population during the last ten years, in the opinion of the Vancouver Province, which has been making an investigation and declares that such migration took place. Immigration into Canada has always been overrated in the official reports and the rate of natural increase, in the calculation of what our population should be a much too high, according to the Province. After examining and comparing the United States decennial census taken in 1921, it suggests that we have reason to cheer up because there has been a greater proportionate increase in population in Canada in the United States during the ten years and, with one exception, every Canadian province along the border has had a greater proportionate increase of population than the States just across the line. The exception is the State of Michigan. The province of Prince Edward Island lost population during the decade but so did three States of the Union.

The Province does not deny that there has been a large exodus from Canada; its argument is as to the extent of the exodus. An admission that a substantial southward movement exists is clearly implied when it says:

In the years before the war Canada was receiving more settlers from the United States than we were sending to that country. We were receiving that year than the whole largest immigration which has stamped its impression forever on the history of this country. It is expected that the movement from the United States to Canada will this year far exceed the movement from Canada to the United States.

The absence of actual statistics and the consequent uncertainty as to the number who have gone from Canada to settle permanently in the United States makes the subject a very good one for debate. But after the gross and coarse have been sufficiently discussed the moral of the whole matter should be quite plain, namely, that we should have careful and accurate statistics kept of the immigration into the Dominion and also of the exodus from the Dominion. We should know the exact number of each nationality entering the country and should have a similar classification of those who are leaving. The statistical branch at Ottawa could apply itself to no more important work than that of arranging for securing accurate information as to the annual exodus to the south. These are the foundation years of the Canadian nation and we should have definite knowledge of the constituent elements that are being worn permanently into it.—Free Press.

Curiously Inevitable

Mother—You shouldn't eat your cake so quickly, Debbie. I once knew a little boy who ate his cake so quickly that he died before he finished it.

Bobbie—And what did they do with the rest of the cake, mother?

We can never retain a friend long if we are not willing to take pains to find out his peculiarities and respect them.

SASKATCHEWAN WOMAN RECOVERS

Found Health by Taking Lydia E. Pinkham's Vegetable Compound

Melara, Saskatchewan—"I saw Lydia E. Pinkham's Vegetable Compound advertised for women's troubles and when a friend recommended it to me I tried it and it has done me so much good in the two years in which I have been taking it that I find I am a different woman since then. I have been taking it since I was as much as I can and you may use my letter as a testimonial."

Mrs. Wm. A. Townsend, Melara, Saskatchewan.

These letters recommending Lydia E. Pinkham's Vegetable Compound ought to convince women of the great worth of this medicine in the treatment of ailments to which they are often subject.

Many women write that she is a different woman now. If you are suffering from troubles women often have or feel all kinds of ailments, or any energy for your regular work, try Lydia E. Pinkham's Vegetable Compound. It is a natural restorative and it is as you use it as Mrs. Thomas and many, many other women.

This medicine has been helping sick women nearly fifty years—nearly a long record of service.

Ski Jumper Injured

Sprained Ankle at End of 110 Foot

Drennan Holton, of Revelstoke, B.C., sustained painful injuries during an exhibition jump in Rastler National Park on the opening day of the fifth annual ski tournament. Holton fell at the end of a 110 foot jump, the longest of the day, and sprained his left ankle. One of the ski left its hold and struck Holton over the left eye cutting a severe gash. Holton was taken to Paradise Inn on a toboggan where his injuries were dressed. Neil Nelson, of Revelstoke, B.C., made 165 feet without falling, the most spectacular jump of the day. Sigurd Johnson, of Tacoma, jumped 85 feet, and Peter Blucher, of Canada, 75 feet. E. Egan, of Hope, B.C., made 90 feet.

ARDENODE NOTES

A goodly number of ladies of the U. P. W. A. wereably entertained at the home of Mrs. J. Taylor Tuesday last.

The reading of the story "Who is to Blame?" resulted in a unanimous vote that this be debated at the next meeting, August 11th, at the home of Mrs. Whitehouse.

Resolved that Dick is more to blame for the family make up, as in the story written by Fletcher Chester, in the Review, published in 2nd August number.

1st speaker, affirmative, Mrs. E. R. Thompson; 2nd speaker, affirmative, Mrs. J. Horvick; 1st speaker, negative, Mrs. Murphy; 2nd speaker, negative, Mrs. Chas. Ransing. This is all fun, so come and laugh and hear the fun.

Mrs. J. Gotthard and Miss May Gotthard have recently returned from an enjoyable stay at Banff.

HERVEY NEWS

Mrs. H. S. B. Chamberlain and Mrs. Wm. Laycraft attended the Ardenode U. P. W. A. on Tuesday last, at the home of Mrs. Taylor. A good time is reported.

Born to a girl, Mrs. Stan. Gillin, wife of Calgary, on Thursday evening, August 1st, a girl, Mother and little daughter both doing well, but Stan is struggling around rather poorly.

Mr. Geo. Laycraft, who has been visiting relatives in the Blackie county reports a bumper crop in that locality.

From the fact that the people through this locality have well attended the Chautauque is a very clear index to the character of the community. An enterprise of this kind can not flourish in a town like Strathmore unless it has the moral, social and financial support of the community at large. The attendance has been a clear index to the character of the community.

Devotees of Chaplin antics are already anticipating his coming to the screen. Their idols' scrupulous efforts at mountain climbing and hair-breadth adventures in the regions around Banff and Lake Louise.

Our Cut Prices Do It

After The Sale

This is clean up week. We find in cleaning up we have quite a few bargains left and we are determined to clean them out regardless of cost. So instead of placing them back into stock we are throwing them out onto tables. All odds and ends and remnants of our summer stock.

MOVIE IDOL TO DO A MOUNTAIN-CLIMBING MARATHON

CHAPLIN, THE STUDENT

CHARLIE, THE CUT-UP

MT. WAPTA IN THE CANADIAN ROCKIES, TESTS THE CLIMBERS SKILL

CHARLIE CHAPLIN wants to make a picture in the Canadian Pacific Rockies. In preparation for such a picture he plans to spend his next vacation in tramping over those mountains; in little patch-work climbing for Charlie, but a hike right across the Rockies.

It is convinced that in the Canadian Pacific Rockies he will find the ideal location for a big picture, something that will make the movie fans sit up on the edges of their seats. While the Comedy King has not a personal knowledge of Canada, wonderland, he is by no means ignorant of its possibilities. A Deputy. Among the books

which he studies during his leisure hours are three huge volumes filled with Canadian data and pictures and with their contents he is thoroughly conversant. The Canadian pictures are being entirely new lines: the familiar popular and somewhat overworked red-coated Mounted Police will not be featured, but something as interesting is promised. The mirth-provoking Chaplin has his serious hours, too, and his business sense that is put to work in seeing that the public gets what the public wants. He has a story in view in which the greater part of the action occurs in picturesque parts of Quebec and Manitoba.

Way to Medicine Hat this fall. Two point near Graham. Work is also being done in the Cavendish district. Dr. Wyatt hopes a couple hundred

Experiments In Improving Country Roads Chautauque Is Enjoyable Week

By Dr. K. A. Glaser, Industrial Research Department, University of Alberta, Member of the Association of Professional Engineers of Alberta

Published by permission of the Science and Art Department, University of Alberta, Hon. Herbert Greenfield, Chairman.

Two closely related Alberta problems are being investigated at the University of Alberta, methods of improving our prairie roads and methods of development of the Alberta bituminous sands. It is not obvious, at first sight, that these problems are related. Yet, it seems probable that it is to the deposit of Alberta bituminous sands that the prairie provinces should look to find the supply of road material that will act as a substitute for the stone and gravel materials used in the making of the well-known hard surfaced roads, which are missing in the prairies. The bituminous sands contain an asphalt which when separated from the associated sands contain and then mixed with a bit of water, quite gradually changes the nature of the soil and makes it resistant to the stabilizing action of water. Natural prairie soils, at all clays, take up water and become very soft and sticky unstable mud that is the despair of the traveller and the highway engineer.

The relationship between the prairie road problem and the bituminous sands is interesting. The prairie road problem is well known: a tremendous volume of highways; most of the worst kind generally speaking, no supposition of or interest in the use of bituminous sand; and not a large enough population or volume of traffic to warrant importation of materials to build the well-known hard surfaced roads.

In connection with this road situation consider the other problem. In the north corner of Alberta there are about 15,000 square miles of country rich in bituminous sands. Large quantities of this bituminous sands are in plain sight along the rivers which have cut their valleys through the formation. This bituminous sand deposit of the prairie of its sort so far found anywhere in the world. It is one of the treasures of Alberta. Two obstacles stand in the way of its development. First the lack of an economical method of separating the asphalt from the sand so that 85 per cent of sand may be left in the north and only 15 per cent of bitumen be removed. Secondly the lack of a sufficiently extensive use for the asphalt, when separated, to make feasible the establishment of development operations. The Industrial Research Department of the University of Alberta is searching diligently for a method of separation and it presents favorable indications continue to be made, it will find one. It is in regard to the second obstacle that the connection between roads and bituminous sands arises. The big use for asphalt today is in road construction. If prairie provinces need roads, if it can be discovered that by the use of reasonably small amounts of bituminous sand asphalt, a type of prairie road adequate to the needs of the rural communities can be built economically, then the big outlet for asphalt from a bituminous sand industry will be open. The solution of the prairie road problem and of the far sand problem are tied up together.

The development of a type of prairie road with the aid of bituminous sand asphalt will depend on an understanding of the properties of prairie soils. The outstanding property of prairie soils, from the road point of view, is their mud-forming ability in presence of water. What is the reason of this mud-forming ability? Studies by soil chemists and physicists have assigned the reason to the colloidal contents of the soils. The term "colloid" need not introduce any mystery into the discussion. Everyday experience brings us all into contact with colloids. Two common examples are gelatine and glue. These substances are hard solid substances when dry and have marked binding qualities but when placed in water they swell to unstable lumps. In many places throughout Alberta nature has concentrated a natural colloid which, if it is not the actual colloid present in our prairie soils, must be very similar to it. I discuss it as "benzoinite". Benzoinite is a hard, almost stone-like material when dry, but in contact with water it swells to about eight times its dry volume into a sticky, unstable mass of mud. This benzoinite or a similar type of substance is present in our prairie soils. It is not hard to understand that hard stable nature when dry and their marvellously quick swelling in presence of water when they come wet. It is the presence of such a colloid in prairie soils which makes it so difficult to get a satisfactory sand-clay mixture for prairie roads. Many prairie soils are natural sand-clay mixtures, yet they soften badly in presence of water. The key to the solution is to find some way of modifying the soil colloid so that it will not swell in presence of water. Some way of keeping it always in its stable form.

The idea of using bitumen in a soil mixture especially in the way that has been described may seem novel to many but in reality it is not new. Some years ago the British Petroleum Company was practised and has met with varied success. A type of pavement called the "Bituminous Earth Pavement" was proposed a few years ago in the States.

The largest audience of the week was present at the lecture given by the Metropolitan Players of "Mrs. Temple's Telegram," an English comedy, which was the best production of its kind that has yet graced the Memorial Hall stage.

Saturdays programme consisted of an interesting lecture by Chief Strongheart on the history of the Red Indians. In the evening Maxine Davis paraded his audience all evening with his display of leopards.

The innovation of presenting Chautauque in the Memorial Hall instead of in the usual tent worked out well and was successful despite weather and added much to the comfort of the audience and gave the artists a better opportunity of presenting their specialities.

The Hall provided ample room, although on Friday evening there was a shortage of chairs.

We understand that Chautauque has been signed up for next year.

Mr. Mitchell was the superintendent during the week, and contributed much to the smooth running of Chautauque.

During about 17 per cent of asphalt into dry pulverized clay soil. The Bureau of Roads Progress Report for 1913 gives account of experimental price of road construction very similar indeed to what we have been told. That asphalt was not used in wet clay. The results were rather encouraging but the idea was not carried to a definite conclusion. Bitumen is also being used by the Bureau of Roads in the form of a surface subgrade for pavements. We do not claim that bitumen is of any use for the work being carried on at the University of Alberta on the road problem. It is simply a case of trying to apply what has already been found out by other people. It can be carried on to local conditions which we have to face in our prairie provinces. In experiments to stabilize with the material to build the roads and to build the roads and we cannot afford to import these materials. Yet we must find a way to stabilize them. The problem is to stabilize them when the weather turns wet. If most things had been made of bitumen when the weather turns wet. If most things had been made of bitumen when the weather turns wet. If most things had been made of bitumen when the weather turns wet.

As stable when wet as they are when dry, our roads would be plenty strong for the next few years to come. If we can get the asphalt colloid the "Bituminous Earth Pavement" was proposed a few years ago in the States.

Attendance Is Large

That Chautauque still holds its place in the affection of the majority of the people of Strathmore was shown by the large attendance every afternoon and evening last week to the performances and lectures.

The week programme has been, in the opinion of the most of those attending, stronger than ever before. Musical programme and lectures were all of instructional value. The All-Sisters Saxophone Quartet opened Chautauque on Monday. They played a very talented group. Capt. Dinsmore Upon gave some very wholesome advice on the giving of a square deal for the children. Its congenial Strathmore on the play grounds they had provided for the children in the park.

On Tuesday Ruthven McDonald and his fellow singers of the Adeline Quartet delighted large audiences both afternoon and evening, and being a real humorist, he had the audience laughing all the time with his anecdotes to growth and his showing up of human foibles.

What many considered the finest day of the week was Wednesday when the Elmer Willoughby Ladies Orchestra had the stage both afternoon and evening, and gave both popular and classical selections. Mrs. Elmer a violin soloist of marked ability, and had to respond to numerous encores. The other ladies of the orchestra were fine examples of their respective instruments. Fenwick Newell, Canadian voice, gave great satisfaction, and was enthusiastically applauded.

On Wednesday afternoon Alexander Thompson, of London, England, gave first hand information on the self-education of the British Empire, especially India and Ireland. Mr. Thompson was not such a fluent orator as the lecturers who preceded him, but his information was of a very informative nature.

Emory Farnell the "One Man Band" handled his numerous instruments with much facility and was also entertaining in his sketches and talks. There were two lectures on Tuesday. One by Wm. H. Studd, very helpful talk on the importance of cultivating efficiency and "seeing life whole" and one by Moritz G. Hiltner, on "Spirits Tossed Knows" and that unfortunate country in a new light to many.

The largest audience of the week was present at the lecture given by the Metropolitan Players of "Mrs. Temple's Telegram," an English comedy, which was the best production of its kind that has yet graced the Memorial Hall stage.

Mail Order Men Prefer to Sell at Long Distance Rather Than Deal With People in Their Own Cities

One of the stock excuses of the man who orders goods from a mail order house is that there are many things that he wants that the local merchants do not carry in stock, and that it is necessary for him to send away from town to get them.

This explanation may be all right on the theory that a poor excuse is better than none, but it fails to pass muster when it is subjected to a little scrutiny.

Ask the man who offers this as an excuse for his dealing with the mail order that he does not go to the local merchant and ask him to order the goods he desires if he can make a small profit in the merchant's stock.

The merchant will very gladly do this, and the merchant and customer will both profit. The merchant can command to do this, but he does the price as the mail order house can make you on the goods the same quality and he can make a small profit.

The customer will profit from the transaction, because he will be dealing with a merchant who stands back of the goods that he sells, and who is easily accessible in case the article purchased does not appear to be all that the customer had expected.

Give Home Merchant Preference

Why not try this plan the next time you need something which you can not find in any of your home stores? The merchant in the average sized town cannot carry in stock every thing that all of the people in his town want at all times.

It would require a capital many times larger than the average merchant can command to do this, but he does the best he can. He ordinarily does carry in stock at all times many things for his customers to the greatest possible degree, but there is a limit to his purchasing ability. He is always ready and willing to do his very best effort to meet the demands of the community. Why not, then, give him the preference over the far distant mail order man if you must have something which is not to be found in the local stores? He will do the business in a satisfactory manner, give you as quick if not quicker service and more satisfactory treatment, and the chances are that he will give you better values for the money. Finally, whatever profit it is to be made on the transaction will stay at home and do its bit toward making the merchant and his town and incidentally yourself more prosperous.

No business can be transacted as satisfactorily at long range as it can when the two parties to the transaction are face to face. The only exception to this rule is in the case of the mail order man himself, who can transact his business with greater success to himself at long distance than he could if he had to meet his customers face to face. That is the reason that he doubtlessly by mail order is selling to the people in his own city. If the goods which the mail order man advertises in his advertising catalogues were the bargains that he represents them to be, he would not have to get outside of the confines of his own city to sell all the goods he could possibly obtain. But the average mail order house not only does not make any effort to sell goods in its own city but will not sell to anyone residing within the city limits. The mail order man does not want to meet his customers face to face.

Local Notings

OF LOCAL INTEREST
• Readers are requested to send in items for this column not later than 12 o'clock Monday noon preceding day of publication. All local news items are welcomed by the Standard. Phone 17 or 68.

Mr. John Anderson is on a visit to Alberta from Oregon at present and was the guest of Mr. J. A. Wilson, of Rockyford, over the weekend. Mr. Anderson is one of the old timers in the district, and farmed successfully north of Nightingale for a number of years. Last year he spent nine months on holiday on the other side of the Atlantic. He says that the crops around this district compare favorably with anything he has seen in Alberta yet.

While some visitors complain at the appearance of our park, etc., the same people are not all favorably impressed by the weeds which infest our roadways. A town with weeds roadside is like a man needing a shave—it looks needy. The weeds are weedy, too, and they should be cut before they seed.

An unfortunate incident happened in the park on Sunday afternoon, when the horse team that pulled the Gleichen 24-0, or some figure of that kind, Gleichen never put anything on the ground. The team was in the past. That is what comes of playing ball—if the performance can be so described—on Sunday. However we do not think that the local stand much danger of being run in for an infraction of the Lord Day Act by playing baseball on Sunday.

It would pay some Strathmore people to visit Langdon Fair on Friday of this week, and see how that community, which is not one-quarter the size of Strathmore, manages to hold a successful fair and real sports day. Of course, the Langdon Fair is booked by the farmers. It was partly because of the lack of farmer backing that no fair was ever held in Strathmore.

Blacksmiths from the district east of Calgary, including Strathmore, Gleichen, Basano, Rockyford, etc., had arranged to hold a picnic at the Indian Reserve south of Gleichen on Saturday, but the rain interfered. The disciples of Vulcan, however, hope to hold their jollification at some time in the near future.

Mr. and Mrs. Crawford, Assiniboia, and daughter, were visiting with Mr. and Mrs. Tom Crawford Thursday and Friday of last week. As will be seen from our advertising columns, Mr. R. A. Lambert, of Nightingale, is agent for the Western Nursery Company.

Mr. John A. McDonald, formerly station agent at Strathmore, now of Carleton, was in town last Sunday seeing Mrs. McDonald off on No. 4. Mrs. McDonald is spending a couple of weeks at Medicine Hat.

During the progress of the Eller-Wiloughby orchestra concert at Strathmore last night, the orchestra was suddenly evening, a somewhat amusing incident happened. The orchestra was about to render a selection from "Samson" and Miss Eller was first explaining the motif of the piece. She was describing the demand of Solomon for the head of John the Baptist, when many of the audience burst into involuntary laughter. Miss Eller stopped for some seconds, apparently at a loss and somewhat annoyed at the unseasonable interruption, and then continued with her explanation. After the performance some of the local people explained to her the reason for the seeming rudeness. Strathmore residents in the possession of an individual who goes under the title of "John the Baptist." His relation to the old saint has never been explained, but some of the audience coupled the description of the saint to his modern namesake, hence the interruption.

Lord and Lady Byng on their Way Across Canada

Upon their arrival in Winnipeg, during their Western tour, Lord and Lady Byng and their party left for a battery of camera-men in front of the Governor's private car at the C.P.R. Station. In this group are, left to right: Capt. Hon. S. W. Erskine, Mr. E. H. Coleman, secretary to the Lieutenant-Governor, Col. Goshen, Gordon, Mr. Justice Perdue, Lady Aikins, Lady Margaret Rosemary, Baron Byng, Major the Hon. H. J. W. Jolliffe, Lady Hon. Hon. T. C. Norris, Premier of Manitoba, Sir James Aikins, Lieutenant-Governor of Manitoba, General H. B. D. Kitchin, and Acting Mayor Fowler.

Mr. and Mrs. Ben Davis are at present on a week's holiday at Banff.

The Strathmore Union Church is now equipped with a full supply of the Presbyterian Book of Praise, new edition. These will be used henceforth for all services. It is a very fine book for its purpose. Come and use one next Sabbath.

Mr. and Mrs. F. H. Tucker and family spent a day in Strathmore last week. Mr. Tucker, who is now Town Clerk of Castor, Alberta, was for some years a resident of Strathmore, and renewed numerous old acquaintances.

Mr. W. G. Way, secretary of the Bow Valley, has been visiting in On. during the past two weeks.

Mr. Harry Tompkins, C. P. R. Station Agent, has returned from a vacation spent in Ontario. He reports that crop conditions are very good down there, and that business in Toronto is booming. Mrs. Tompkins and

family will return about the middle of the month. During his absence Mr. Tompkins' place was filled by Mr. Mutch, relieving agent.

Mr. Davidson, analyst, Winnipeg, was in Strathmore last week on a visit to his mother, Mrs. A. W. Gilvin.

Miss Prickett, Calgary, is at present visiting with Mrs. Thos. E. Wright.

Mrs. E. M. Stoddley and family spent Chautauque week in Strathmore with Mrs. Ray Bruce.

Mrs. F. H. Harrison spent last week in Strathmore with Mrs. P. R. Lilly.

Mr. R. Fox's big sale concluded last Saturday, after a very successful month. Despite the present financial stringency, the bargains offered drew many cash buyers, and Mr. Fox is more than ever convinced of the value of consistent advertising and of giving the cash buyers the benefit of low prices. That is the successful way to meet outside competition.

Last Wednesday morning a travelling man capitalized in his car near the second crossing east of town, but was fortunate in escaping injury. The car was righted and towed into town by Mr. Harold Bell, who repaired the damage. This is one of the most dangerous parts of the Strathmore Calgary road, and it would be conducive to public safety if the grade was lowered, especially at the turns.

We have received a copy of the Half Century Anniversary number of the Toronto Mail and Empire. This handsome volume comprises a review of the social, educational, agricultural, financial and industrial and commercial development and progress of Canada from 1827 to 1927. It is most fully illustrated, and a perusal of it strengthens the faith of the reader in Canada when he sees the wonderful progress our service and prices will satisfy the most exacting buyer.

**Insure Your Premium**

If you will deposit in your savings account each month one-twelfth of your annual insurance premium, it will be easy to pay for your life insurance when due.

Nothing in addition to your savings can mean as much to you in old age, or to your relatives after death, as insurance. Start a savings account with us today.

CRAGGANTLER NEWS

Clayton Anderson is contemplating a trip to Sweden this winter. He has been one of the most energetic and progressive in Craggantler circles and he says his crop can't be beat this year.

L. H. Laveland has a fine crop of strawberries and plums. The plums are exceptionally good, having to strike the branches in deep from breaking the plums being so numerous.

We must congratulate ourselves on having Mr. Peterson take some of his Strathmore farming friends around our district before having them tell us what they thought about the crops. Which was very complimentary indeed.

H. H. Ellis and N. H. Christensen attended the irrigation convention at Brooks. They came back highly delighted with the sight seeing and what they heard. Mr. Christensen says if he would have paid the farmers to have had a couple of days to see and hear what can be done with water.

Le Stevenson is back after ten days trip in the northern part of the province.

D. McPherson, of Edmonton was down meeting old acquaintances. He was well pleased with the prospects on his farm. He says the crops have not been so poor around Edmonton since he went north.

Do Business In Open

(Continued from page 1)
He can do business better so far as he is concerned if he can make a few hundred dollars away from his office.

Does Business In Open
The man who sells goods over the counter, on the other hand, does business in the open. He cannot hide behind a corporate name or talk to a customer from behind a counter.

The man who sells goods over the counter, on the other hand, does business in the open. He cannot hide behind a corporate name or talk to a customer from behind a counter.

There is no reason in the world for any person to send his money to a small order house because he cannot find the article he wants in his local store. The local merchant is in business for the very purpose of getting what you want. He has the information that will enable him to tell you what you want and to get it as quickly as you could get it from a small order house. It is only fair to give him the chance to make sure of the transaction and it is only fair to yourself to keep that profit at home rather than send it away from which will never return.

GRAIN PRICES

—O—
August 8th, 1922.
